# Trends

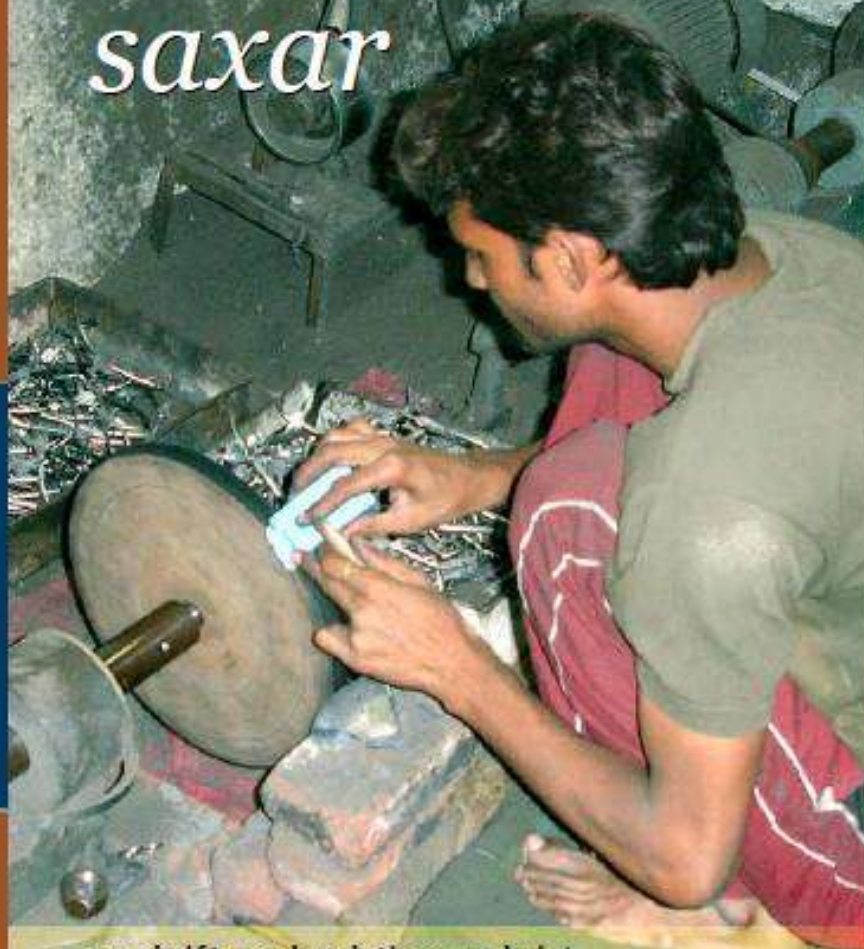

- ▶ Eco-labelling
  - ▶ Supply chain management/ Code of conduct
  - ▶ Targeting materials PVC, silver etc
  - ▶ Carbon footprint
  - ▶ Not just products, but also services
  - ▶ Guidelines/databases
  - ▶ Collaboration with the suppliers
-

Swedish hospitals has a joint code of conduct whereby all companies with which the regions signs an agreement must demonstrate their acceptance of social and ethical responsibility.

# Vita rockar och vassa saxar

en skrift om landstingens brist  
på etiska inköpskrav

Den här skriften är en kortversion av SwedWatchs rapport "Vita rockar och vassa saxar". Rapporten bygger på research under 2006-2007 med fältbesök i Pakistan och Indien, samt omfattande lokala förstudier med intervjuer med omkring 70 anställda i tillverkningen till svenska offentliga upphandlare. I projektet ingår även filmen "Vita rockar till vilket pris?" av LottaFilm. Samtliga namn på anställda är fingerade för att undvika att utsätta de som intervjuats för risker.

Fair Trade Center och Rena kläder medverkar i publiceringen av rapporten och filmen.

Denna skrift har publicerats med ekonomiskt stöd av Sida, som dock inte tar ställning till skriftens innehåll.

Författare: Kristina Bjurling, researcher, SwedWatch.  
Foto: Kristina Bjurling.

Publiceringsdatum: mars 2007.

Priority is to be given to local produce and organic foods.

Region Skåne's target is for the proportion of organic produce to amount to 50% by 2016.

Only 100% organic coffee is to be used in Region Skåne's administrations, replacing conventional coffee.

Region Skåne has been a pioneer in phasing out PVCs and phthalates from medical supplies.

PVC-free alternatives for sustainable healthcare in Region Skåne

PVC-free alternatives  
for sustainable healthcare in Region Skåne
